

MAX

3 in 1 Total Stabilizer Treatment

**Max replaces the need to buy 3 separate products.
Total stabilizer protection in one bottle**

- * **Max: With Anti-Static Agents. Prevents Static build-up**
Stops dust and lint particles being attracted to finished work, eliminates pin-holes on prints or negatives caused by dust or lint particles.
- * **Max: With Wetting Agents to Stop Drying Marks or Streaking**
This causes the excess stabilizer to sheet off evenly. Ensures even drying and clean, streak free print and negatives.
- * **Max: With Cleaning Agents to Keep Stabilizer Solutions Clean & Fresh**
Unique additives in **MAX** greatly improves stabilizer life. Stops clouding, slime, souring (rotten egg smell, or particles floating in stabiliser).

MAX is Safe on All

Prints, negatives, transparencies, film and photographic emulsions are blemish free with enhanced image stability. **MAX** is totally compatible with all stabilizers, super stabilizers and conditioner rinses in final rinse tanks.

Economical & Easy to Use:

Simply add 1 part of **MAX** to 200 parts when making up **fresh** stabilizer / rinse additive solution, i.e. add 25 ml to each 5 litres of stabilizer / rinse additive solution. i.e. add:

1.7 fluid ounces (50 ml)	of MAX	to each 2.6 gallons (10 litres) of stabilizer solution		
4.25 fluid ounces (125 ml)	of MAX	to each 6.5 gallons (25 litres)	“	“
8.5 fluid ounces (250 ml)	of MAX	to each 13 gallons (50 litres)	“	“
34 fluid ounces (1 litre)	of MAX	to each 52 gallons (200 litres)	“	“

N.B. Before using **MAX** for the first time thoroughly clean out stabilizer and re-plenisher tanks. Always add **MAX** to **NEW** clean stabilizer solution for maximum efficiency.
